# WHO IS LOOKING OUT FOR YOUR CLIENTS?

In today's economy everyone wants to stretch their dollar as far as possible. Clients expect that the firms representing them have done their due diligence to find the best possible ways to handle their business and save money. Overspending can be thing of the past, but with so many different vendors out there how do you know who to choose and trust?

CORNERSTONE IS YOUR TRUSTED PARTNER FOR COMPLETE LITIGATION SUPPORT SOLUTIONS AND EXPERT SERVICE.

CornerStone strives to offer a flexible electronic discovery solution by utilizing unparalleled industry knowledge, technical expertise and ground-breaking software innovation. CornerStone offers electronic discovery services that drastically improve the efficiency of collecting, processing and reviewing electronic documents, thus lowering the overall cost of litigation for law firms and accounting firms, corporations, and governmental agencies. We participate in these steps of the Electronic Discovery Reference Model (EDRM) workflow: Identification, Preservation, Collection, Processing, Review, Analysis, and Production.

Our competitive advantage is our relentless focus on speed and ease of use for the features that reviewers and litigation teams use most. CornerStone offers Disco, the simplest and fastest way to search, review, tag and produce documents, giving access to all this functionality through three easy-to-understand screens and leveraging lawyers' existing familiarity with services like Westlaw™ and Lexis-Nexis™. Search and document navigation speeds in the platform are literally 10 times faster than the competitors, and use the latest search technologies used by such companies as Google and Amazon. This provides you a more efficient and enjoyable review experience. Our web-based software can be used in any modern browser including mobile devices such as iPads and other tablets or phones.

Ingest/Process/Cull → Real-time Collabrative Review

THE CORNERSTONE SYSTEM

We offer you a cloud based solution for reviewing your case material on a secure platform. From anywhere in the world, at any time, you can instantly search and retrieve your case-critical documents. Disco is a real-time collaborative tool that allows you to quickly and easily set up data and image collections for multiple simultaneous users. Proven technology that is 10 times faster than the competitors.
